

Level 3 - New CBP Primary

The In Transit passenger will arrive in the new CBP Primary Area from the sterile corridor and be processed along with all other passengers. Once through CBP Primary, the airlines shall direct the In Transit passenger to the new Central Core via temporary escalator, stair or elevator. The temporary escalator, stair and elevator will be used by all departing passengers until the new security screening checkpoint is completed, therefore the In Transit passengers will merge with all departing passengers in Level 3 of the existing TBIT post security.

The In Transit passenger will enter the new Central Core via the temporary escalator, stair or elevator with all departing passengers. The In Transit passenger will then be free to move about the new Bradley West facility the same as any departing passenger. All passengers can shop and eat in the new concessions, walk down the concourses, enjoy the airline premium lounges or pass back through security out to the curb. If they choose to exit they would have to go through the TSA security screening checkpoint.

Level 4 - New Central Core/Departures Level
